INTERNATIONAL CIVIL AVIATION ORGANIZATION

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of ICAO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Les appellations employées dans cette publication et la présentation des données qui y figurent n'impliquent de la part de l'OACI aucune prise de position quant au statut juridique des pays, territoires, villes ou zones, ou de leurs autorités, ni quant au tracé de leurs frontières ou limites.

Las denominaciones empleadas en esta publicación y la forma en que aparecen presentados los datos que contiene no implican, de parte de la OACI, juicio alguno sobre la condición jurídica de ninguno de los países, territorios, ciudades o áreas, o de sus autoridades, ni respecto de la delimitación de sus fronteras o límites.

Употребляемые обозначения и изложение материала в настоящем издании не означают выражения со стороны ИКАО какого бы то ни было мнения относительно правового статуса страны, территории, города или района, или их властей, или относительно делимитации их границ.

ليس في التسميات المستخدمة في هذا المطبوع ولا في طريقة عرض مادته ما يتضمن التعبير عن أي رأي كان للايكاو بشأن الوضع القانوني لأي بلد أو إقليم أو مدينة أو منطقة، أو لسلطات أي منها، أو بشأن تعيين تخومها أو حدودها.

本出版物中所用称谓和陈述材料之方式，并不代表国际民航组织对任何国家、领土、城市或地区或其当局的法律地位，或就其边境或疆界的划分，表达了任何意见。

Published yearly by ICAO under the authority of the Secretary General of the
INTERNATIONAL CIVIL AVIATION ORGANIZATION
999 Robert-Bourassa Boulevard, Montréal, Quebec, Canada H3C 5H7

FOREWORD

GENERAL

This document contains designators for those aircraft types which are most commonly provided with air traffic service (ATS). It was originally prepared as a result of recommendations of the Rules of the Air and Air Traffic Services/Operations Divisional Meeting (May 1963) and the Third Meeting of the Air Traffic Control Automation Panel (October 1963) and was published in accordance with directives of the Council. As a result of the substantial comments received from the air traffic services units, the most common operational users of designators, the Secretariat with the assistance from Air Traffic Control The Netherlands and the European Organization for the Safety of Air Navigation (EUROCONTROL), undertook in 1996 a major revision of the document. The revision was done with the aim of ensuring that the document satisfies its original purpose and amended to accommodate the increased use of automation in ATS and in data exchange.

New editions of the document will be issued once a year and to keep the document up-to-date between the editions, amendments to the latest edition will be published as they accumulate. The information contained in this document is also made available for printing, viewing and searching in an electronic format via an on-line website database which can be accessed at www.icao.int/publications/DOC8643/Pages/default.aspx.

Errors, omissions, requests for additional assignments or amendments should be addressed to the Secretary General of ICAO, 999 Robert-Bourassa Boulevard, Montréal, Quebec, Canada H3C 5H7.

DOCUMENT STRUCTURE

PART 1: lists the common names of the aircraft manufacturers followed by the aircraft types they produce(d).

PART 2: lists the aircraft types by their type designator in an alpha-numeric order.

PART 3: lists the aircraft types by their model number and/or model name.

PART 4: lists the common names of the aircraft manufacturers followed by their full name(s) and Manufacturing Code.

Note 1.— Where model numbers or model names are between brackets, they refer to military model numbers or names following the manufacturer's, or vice versa.

Note 2.— An aircraft type built by more than one manufacturer (licence-built, company take-overs, company name changes, etc.) is listed under the common name of each manufacturer.

FORMULATION OF AIRCRAFT TYPE DESIGNATORS AND ADDITIONAL INFORMATION

Aircraft Type Designators

When assigning the aircraft[1] type designator, ICAO will do that in accordance with the following basic principles:

a) it will, in principle, assign an aircraft type designator to all aircraft having a maximum take-off mass of more than 454 kg/1 000 lb;

b) a designator will consist of not more than four characters and will primarily be intended for use in **flight plans** and associated air traffic services **messages**;

c) a designator will, in principle, be derived from the manufacturer's model number or model name or, from a common military type number;

d) only one designator will be assigned per aircraft type;

[1] Includes manned and unmanned aircraft.

e) a designator will not be changed for licence-built aircraft, when the aircraft type is sold to or manufactured by a different company or, when the name of a manufacturing company changes or, when the aircraft type is derived or converted from another type;

f) a different designator for a variant or subtype will only be allocated when a difference in a performance is significant for air traffic services, or when no shared designator can be assigned;

g) if a designator has to be used for a balloon, a glider, an airship, a micro-/ultra-light aircraft, a micro-/ultra-light helicopter, a micro-/ultra-light gyrocopter, or a powered parachute/paraplane, the following designators shall be used respectively: **BALL, GLID, SHIP, ULAC, UHEL, GYRO, PARA**;

Note 1.— For the purposes of this document, micro-/ultra-light aircraft are those aircraft types with a maximum take-off mass of 454 kg/1 000 lb or less and a stalling speed not greater than 35 kt.

Note 2.— Micro-/ultra-light helicopters and gyrocopters are those helicopters or gyrocopters with a maximum certified take-off mass of 454 kg/1 000 lb or less.

h) if a designator has to be used for an unmanned aircraft (UA) having a maximum take-off mass of 454 kg/1 000 lb or less, the following designators shall be used respectively:

FFLO (forward flight lift only) for a UA which is not capable of hover or vertical flight and needs to be in horizontal motion to sustain flight.

VFHC (vertical flight and hover capability) for a UA which is capable of vertical flight and hover.

Note.— Tilt-rotor or tilt-wing UA, under this item, should use FFLO or VFHC depending on the aircraft capabilities for the particular operation.

i) aircraft types not listed in this document shall use the designator **ZZZZ**, with a description of the type in field 18 of the ICAO flight plan;

j) the more important "homebuilt" aircraft types will also be assigned designators, however, they will only be listed under the heading of the original designer, or under the heading of a manufacturer that produces or produced the type in series; and

k) in order to avoid confusion, Roman numerals as part of aircraft model numbers or names will, in this document, always be replaced by Arabic numerals.

Wake Turbulence Category (WTC)

The wake turbulence category (WTC) indicator will follow the aircraft type designator and is provided on the basis of the maximum certificated take-off mass, as follows:

J (Super)	specific aircraft types of 136 000 kg (300 000 lb) or more;
H (Heavy)	aircraft types of 136 000 kg (300 000 lb) or more, except those listed as **J**;
M (Medium)	aircraft types less than 136 000 kg (300 000 lb) and more than 7 000 kg (15 500 lb); and
L (Light)	aircraft types of 7 000 kg (15 500 lb) or less.

Note.— Where variants of an aircraft type fall into different wake turbulence categories, both categories are listed (e.g. L—M or M—H). In these cases, it is the responsibility of the pilot or operator to enter the appropriate single letter wake turbulence category indicator in Item 9 of the ICAO model flight plan form.

Wake Turbulence Groups (WTG)

The wake turbulence group (WTG) designator is used to apply reduced wake turbulence separation minima contained in the *Procedures for Air Navigation Services – Air Traffic Management* (PANS-ATM, Doc 4444), however, the designator is not entered into the ICAO model flight plan form. The WTG designators are based on wake generation and resistance characteristics of the aircraft, which are primarily dependent on maximum certificated take-off mass, wing characteristics and speeds.

The group designators are described as follows:

GROUP A – aircraft types of 136 000 kg or more, and a wing span less than or equal to 80 m but greater than 74.68 m;

GROUP B – aircraft types of 136 000 kg or more, and a wing span less than or equal to 74.68 m but greater than 53.34 m;

GROUP C – aircraft types of 136 000 kg or more, and a wing span less than or equal to 53.34 m but greater than 38.1 m;

GROUP D – aircraft types less than 136 000 kg but more than 18 600 kg, and a wing span greater than 32 m;

GROUP E – aircraft types less 136 000 kg but more than 18 600 kg, and a wing span less than or equal to 32 m but greater than 27.43 m;

GROUP F – aircraft types less 136 000 kg but more than 18 600 kg, and a wing span less than or equal to 27.43 m; and

GROUP G – aircraft types of 18 600 kg or less (without wing span criterion).

Description of Aircraft Type

Three characters will be used to compose the description of aircraft type:

First character:

L landplane
S seaplane
A amphibian
H helicopter
G gyrocopter
T tiltrotor aircraft

Note.— A floatplane, which can temporarily be converted to a landplane or vice versa, will not be listed as a seaplane or amphibian, but as a landplane.

Second character:

1, 2, 3, 4, 6, 8 or C, — number of engines

Note.— Character C is applicable to fixed-wing aircraft only and indicates that two engines are coupled to drive a single propeller system.

Third character:

P piston engine
T turboprop/turboshaft engine
J jet engine
E electric engine
R rocket engine

*Example: **L2T** — a landplane with two turboprop/turboshaft engines.*

ACTION TO BE TAKEN BY STATES

States are requested to take appropriate action, i.e.:

a) to advise aircraft manufacturers of the purpose of the *Aircraft Type Designators* and to request their cooperation in its development and its implementation by applying the principles on which it is based when assigning such designators;

b) in order to keep the document up to date provide ICAO annually, if possible on an electronic file, with the following information from their aircraft registers:

— aircraft registration;
— manufacturer, type and model number;

— manufacturer's serial or construction number; and
— expiration date of the Certificate of Airworthiness or permit/authorization to fly;

c) to request their military departments to agree to the use of a civil designator for those aircraft types which are employed in both civil and military operations.

AVANT-PROPOS

GÉNÉRALITÉS

Le présent document contient la liste des indicatifs des types d'aéronef qui bénéficient le plus couramment du service de contrôle de la circulation aérienne. Il a été élaboré à l'origine pour donner suite aux recommandations de la Réunion Règles de l'air et services de la circulation aérienne/Exploitation à l'échelon division (mai 1963) et de la troisième Réunion du Groupe d'experts sur l'automatisation du contrôle de la circulation aérienne (octobre 1963), et publié conformément aux directives du Conseil. Pour tenir compte des observations de fond formulées par les organismes des services de la circulation aérienne, qui sont les utilisateurs opérationnels les plus courants des indicatifs, le Secrétariat a entrepris en 1996 de réviser ce document en profondeur, avec l'aide de l'organisme chargé du contrôle de la circulation aérienne des Pays-Bas et de l'Organisation européenne pour la sécurité de la navigation aérienne (EUROCONTROL). Cette révision visait à s'assurer que le document remplit bien son rôle initial, tout en l'amendant pour tenir compte de l'usage accru de l'automatisation en ATS et dans les échanges de données.

Une nouvelle édition du présent document sera publiée chaque année, et pour tenir le document à jour dans l'intervalle, des amendements de la dernière édition seront publiés à mesure qu'ils se présentent. Les renseignements contenus dans le présent document peuvent également faire l'objet de recherches, être imprimés et consultés en format électronique à partir d'une base de données en ligne du site web de l'OACI, accessible à l'adresse suivante :
www.icao.int/publications/DOC8643/Pages/default.aspx.

Toute correspondance concernant des erreurs ou des omissions, ou une demande d'attribution ou de modification d'attribution, doit être adressée au Secrétaire général de l'OACI, 999, boul. Robert-Bourassa, Montréal (Québec), Canada H3C 5H7.

STRUCTURE DU DOCUMENT

PARTIE 1 : liste des noms usuels des constructeurs d'aéronefs, suivis des types d'aéronef qu'ils produisent.

PARTIE 2 : liste des types d'aéronef dans l'ordre alphanumérique des indicatifs de type.

PARTIE 3 : liste des types d'aéronef par numéro et/ou nom de modèle.

PARTIE 4 : liste des noms usuels des constructeurs d'aéronefs, suivis de leur nom au complet et de leur code de constructeur.

Note 1.— Lorsque le numéro ou le nom du modèle est entre crochets, il s'agit du numéro ou du nom d'un modèle militaire suivi de celui attribué par le constructeur, ou vice versa.

Note 2.— Tout type d'aéronef construit par plusieurs constructeurs (construction sous licence, absorption d'une société, changement de nom d'une société, etc.) figure dans la liste sous le nom usuel de chaque constructeur.

ÉTABLISSEMENT DES INDICATIFS DE TYPES D'AÉRONEF ET RENSEIGNEMENTS COMPLÉMENTAIRES

Indicatifs de types d'aéronef

L'OACI attribuera les indicatifs de types d'aéronef[1] en se fondant sur les grands principes suivants :

a) elle assignera en principe un indicatif de type d'aéronef à tous les aéronefs dont la masse maximale au décollage est supérieure à 454 kg (1 000 livres) ;

b) les indicatifs ne comporteront pas plus de quatre caractères et seront surtout destinés à être utilisés dans les **plans de vol** et les **messages** corrélatifs des services de la circulation aérienne ;

c) tout indicatif sera en principe dérivé du numéro ou du nom du modèle conçu par le constructeur, ou encore d'un numéro de type militaire courant ;

1. Comprend les aéronefs habités et non habités.

d) un seul indicatif sera attribué à chaque type d'aéronef ;

e) l'indicatif ne sera pas modifié pour un aéronef construit sous licence, lorsque le type d'aéronef est acquis ou construit par une autre société, ou lorsque le nom du constructeur change, ou encore si le type d'aéronef en question est dérivé d'un autre type ou constitue une conversion de type ;

f) une variante ou un sous-type n'obtiendra un indicatif différent que s'il y a une différence significative des performances pour les services de la circulation aérienne, ou s'il n'est pas possible d'attribuer un indicatif commun ;

g) si un indicatif se révèle nécessaire pour un ballon, un planeur, un dirigeable, un aéronef ultra-léger, un hélicoptère ultra-léger, un autogire ultra-léger ou un parachute/parapente motorisé, les indicatifs utilisés seront respectivement les suivants : **BALL**, **GLID**, **SHIP**, **ULAC**, **UHEL**, **GYRO, PARA** ;

Note 1.— Aux fins du présent document, les aéronefs ultra-légers sont des types d'aéronef dont la masse maximale au décollage est égale ou inférieure à 454 kg (1 000 livres) et dont la vitesse de décrochage ne dépasse pas 35 nœuds.

Note 2.— Les hélicoptères ultra-légers et les autogires ultra-légers sont des hélicoptères et des autogires dont la masse maximale au décollage certifiée est égale ou inférieure à 454 kg (1 000 livres).

h) si un indicatif se révèle nécessaire pour un aéronef non habité dont la masse maximale au décollage est égale ou inférieure à 454 kg (1 000 livres), les indicatifs utilisés seront respectivement les suivants :

FFLO (portance en vol vers l'avant seulement) pour un aéronef non habité qui n'est pas en mesure d'effectuer de vol stationnaire ou de vol vertical et qui doit être en mouvement horizontal pour pouvoir voler.

VFHC (vol vertical et vol stationnaire) pour un aéronef non habité qui est en mesure d'effectuer un vol vertical et un vol stationnaire.

Note.— Au titre de cet alinéa, un aéronef non habité à rotors basculants ou à ailes basculantes devrait utiliser l'indicatif FFLO ou VFHC en fonction de ses capacités pour un vol en particulier.

i) pour les types d'aéronef qui ne figurent pas dans le présent document, on utilisera l'indicatif **ZZZZ**, en fournissant une description du type dans le champ 18 du plan de vol OACI ;

j) des indicatifs seront attribués aux types d'aéronef « de fabrication artisanale » les plus importants, mais ils ne figureront dans la liste que sous la rubrique du concepteur initial, ou sous celle d'un constructeur qui produit ou a produit en série le type considéré ;

k) pour éviter les confusions, les chiffres romains utilisés dans les numéros ou les noms de modèles d'aéronef seront toujours remplacés dans le présent document par des chiffres arabes.

Catégorie de turbulence de sillage (WTC)

L'indicatif de catégorie de turbulence de sillage suivra l'indicatif de type d'aéronef et sera fondé sur la masse maximale au décollage certifiée, comme suit :

J (super gros-porteur)	types d'aéronef spécifiques de masse égale ou supérieure à 136 000 kg (300 000 livres) ;
H (gros-porteur)	types d'aéronef de masse égale ou supérieure à 136 000 kg (300 000 livres), sauf ceux énumérés dans la catégorie J ;
M (moyen tonnage)	types d'aéronef de masse inférieure à 136 000 kg (300 000 livres) mais supérieure à 7 000 kg (15 500 livres) ;
L (faible tonnage)	types d'aéronef de masse égale ou inférieure à 7 000 kg (15 500 livres).

Note.— Lorsqu'une version d'un type d'aéronef correspond à différentes catégories de turbulence de sillage, les deux catégories sont indiquées (soit L—M ou M—H). Dans ces cas, il appartiendra au pilote ou à l'exploitant d'indiquer la catégorie de turbulence de sillage appropriée en inscrivant l'indicatif à une lettre à la case 9 du modèle OACI de formule de plan de vol.

Groupes de turbulence de sillage (WTG)

L'indicatif du Groupe de turbulence de sillage (WTG) est utilisé pour appliquer les minimums réduits de séparation en fonction de la turbulence de sillage qui figurent dans les *Procédures pour les services de navigation aérienne – Gestion du trafic aérien* (PANS-ATM, Doc 4444), toutefois l'indicatif n'est pas inscrit dans le modèle de formule de plan de vol de l'OACI. Les indicatifs du WTG sont fondés sur l'intensité de la turbulence et les caractéristiques de résistance de l'aéronef, qui sont principalement fonction de la masse maximale au décollage certifiée, des caractéristiques des ailes et de la vitesse.

Les indicatifs de groupe sont décrits comme suit :

GROUPE A — types d'aéronefs de masse supérieure ou égale à 136 000 kg et d'envergure inférieure ou égale à 80 m mais supérieure à 74,68 m ;

GROUPE B — types d'aéronefs de masse supérieure ou égale à 136 000 kg et d'envergure inférieure ou égale à 74,68 m mais supérieure à 53,34 m ;

GROUPE C — types d'aéronefs de masse supérieure ou égale à 136 000 kg et d'envergure inférieure ou égale à 53,34 m mais supérieure à 38,1 m ;

GROUPE D — types d'aéronefs de masse inférieure à 136 000 kg mais supérieure à 18 600 kg et d'envergure supérieure à 32 m ;

GROUPE E — types d'aéronefs de masse inférieure à 136 000 kg mais supérieure à 18 600 kg et d'envergure inférieure ou égale à 32 m mais supérieure à 27,43 m ;

GROUPE F — types d'aéronefs de masse inférieure à 136 000 kg mais supérieure à 18 600 kg et d'envergure inférieure ou égale à 27,43 m ;

GROUPE G — types d'aéronefs de masse inférieure ou égale à 18 600 kg (sans critère sur l'envergure).

Description du type d'aéronef

Trois caractères seront utilisés pour composer la description du type d'aéronef :

Premier caractère :

L avion
S hydravion
A amphibie
H hélicoptère
G autogire
T aéronef à voilure basculante

Note.— Les avions à flotteurs qui peuvent être convertis temporairement en avions ordinaires, et vice versa, ne figureront pas dans la liste comme hydravions ou amphibies, mais plutôt comme avions.

Deuxième caractère :

1, 2, 3, 4, 6, 8 ou **C** — nombre de moteurs

Note.— La lettre C s'applique seulement aux aéronefs à voilure fixe et indique la présence de deux moteurs couplés entraînant une hélice unique.

Troisième caractère :

P moteur à pistons
T turbopropulseur/turbomoteur
J réacteur
E moteur électrique
R moteur-fusée

*Exemple : **L2T** — avion bimoteur à turbopropulseurs/turbomoteurs.*

MESURES QUE LES ÉTATS DOIVENT PRENDRE

Il est demandé aux États de prendre les mesures appropriées suivantes :

a) informer les constructeurs d'aéronefs de l'objet du document *Indicatifs de types d'aéronef* et solliciter leur collaboration pour l'élaboration et la mise en œuvre de ce document, en appliquant les principes qui régissent l'attribution des indicatifs en question ;

b) pour la tenue à jour du document, fournir annuellement à l'OACI, si possible sous forme électronique, les renseignements ci-après, tirés de leurs registres aéronautiques :

— immatriculation de l'aéronef ;
— constructeur, numéro de type et de modèle ;
— numéro de construction ou de série du constructeur ;
— date d'expiration du certificat de navigabilité, ou encore du permis ou de l'autorisation de voler ;

c) demander à leurs autorités militaires d'accepter d'utiliser un indicatif civil pour les types d'aéronef qui sont utilisés indifféremment pour des vols civils et des vols militaires.

PREÁMBULO

GENERALIDADES

Este documento contiene los designadores de aquellos tipos de aeronaves a los que se proporciona más comúnmente servicio de tránsito aéreo (ATS). Se preparó originalmente como resultado de las recomendaciones de la Conferencia departamental "Reglamento del aire y servicios de tránsito aéreo/operaciones" (mayo de 1963) y de la Tercera Reunión del Grupo experto sobre automatización del control del tránsito aéreo (octubre de 1963) y se publicó de conformidad con las instrucciones del Consejo. A raíz de los abundantes comentarios recibidos de las dependencias de servicios de tránsito aéreo, que son quienes utilizan más corrientemente los designadores a nivel operacional, la Secretaría emprendió en 1996 una importante revisión de este documento con la ayuda del Control de tránsito aéreo Países Bajos y la Organización Europea para la Seguridad de la Navegación Aérea (EUROCONTROL). La revisión se efectuó con el objetivo de asegurar que el documento satisface el propósito original, habiéndose enmendado en atención al creciente uso de la automatización en ATS y en el intercambio de datos.

Se publicará una nueva edición cada año y para mantener el documento actualizado entre las ediciones, se publicarán las enmiendas de la última edición en la medida en que se acumulen. Además, en el sitio www.icao.int/anb/ais/8643 puede obtenerse la información de este documento para utilizarla con fines de búsqueda, impresión, análisis y para telecargarla en formato electrónico a partir de la base de datos del sitio web.

Toda correspondencia relativa a errores y omisiones o solicitud respecto de asignaciones adicionales o enmienda deberá enviarse al Secretario General de la OACI, 999 Robert-Bourassa Boulevard, Montreal, Quebec, Canadá, H3C 5H7.

ESTRUCTURA DEL DOCUMENTO

PARTE 1: contiene la lista de los fabricantes de aeronaves por su nombre comercial corriente, seguido de los tipos de aeronaves que fabrican.

PARTE 2: contiene la lista de tipos de aeronaves, por designador de tipo en orden alfanumérico.

PARTE 3: contiene la lista de tipos de aeronaves, por número de modelo y/o nombre del modelo.

PARTE 4: contiene la lista de los fabricantes de aeronaves por su nombre comercial corriente, seguido de su nombre completo y el código del fabricante.

Nota 1.— Cuando el número o nombre del modelo va entre paréntesis, significa que se trata de un número o nombre de modelo militar, indicándose seguidamente el fabricante, o viceversa.

Nota 2.— Cuando un tipo de aeronave lo construye más de un fabricante (bajo licencia, por absorción de la empresa, cambio de nombre de la empresa, etc.), aparece en la lista bajo el nombre comercial corriente de los distintos fabricantes.

FORMULACIÓN DE LOS DESIGNADORES DE TIPOS DE AERONAVE E INFORMACIÓN ADICIONAL

Designadores de tipos de aeronave

Cuando proceda a la asignación del designador de tipo de aeronave[1], la OACI se regirá por los siguientes principios básicos:

a) en principio, se asignará un designador de tipo de aeronave a toda aeronave que tenga una masa máxima de despegue de más de 454 kg/1 000 lb;

b) el designador constará de cuatro caracteres como máximo y su uso primordial será en los **planes de vuelo** y los correspondientes **mensajes** de los servicios de tránsito aéreo;

c) el designador se establecerá en principio a partir del número o nombre del modelo del fabricante o del número del tipo militar común;

d) sólo se asignará un designador por tipo de aeronave;

e) el designador no cambiará en el caso de aeronaves fabricadas bajo licencia, ni cuando el tipo de aeronave lo venda o fabrique una empresa distinta o cambie el nombre de la empresa que lo fabrica o cuando se trate de un tipo de aeronave derivado o convertido a partir de otro tipo;

f) sólo se asignará un designador distinto para una variante o subtipo cuando la diferencia de performance sea significativa para los servicios de tránsito aéreo o cuando no pueda asignarse un designador compartido;

g) si debe utilizarse un designador para un globo, planeador, dirigible, aeronave micro/ultraligera, helicóptero micro/ultraligero, girohelicóptero micro/ultraligero, o un paracaídas/parapente motorizado, se emplearán respectivamente los designadores siguientes: **BALL, GLID, SHIP, ULAC, UHEL, GYRO, PARA**;

Nota 1.— A los efectos de este documento, se consideran aeronaves micro/ultraligeras los tipos de aeronaves con una masa máxima de despegue de 454 kg/1 000 lb o inferior y una velocidad de pérdida que no sobrepase 35 kt.

Nota 2.— Se consideran helicópteros y girohelicópteros micro/ultraligeros aquellos que tienen una masa máxima certificada de despegue de 454 kg/1 000 lb o inferior.

h) si tiene que usarse un designador para una aeronave no tripulada (UA) con una masa máxima de despegue de 454 kg/1 000 lb o inferior, se usarán respectivamente los siguientes designadores:

FFLO (vuelo únicamente hacia delante para tener sustentación) para una UA que no tiene capacidad de vuelo estacionario o de vuelo vertical y tiene que estar en movimiento horizontal para sostener el vuelo.

VFHC (capacidad de vuelo vertical y de vuelo estacionario) para una UA que tiene capacidad de vuelo vertical y de vuelo estacionario.

Nota.— Las UA de rotor basculante o de ala basculante que están recogidas en este apartado, deberían usar el designador FFLO o VFHC según sus capacidades para la operación de que se trate.

i) los tipos de aeronaves que no figuran en las listas de este documento utilizarán el designador **ZZZZ**, describiéndose el tipo en cuestión en la casilla 18 del plan de vuelo de la OACI;

[1] Incluye las aeronaves tripuladas y no tripuladas.

j) también se asignarán designadores a aquellos tipos de aeronaves más importantes construidas "por aficionados", pero sólo se alistarán bajo el encabezamiento del diseñador original, o bajo el encabezamiento de un fabricante que produzca o haya producido dicho tipo en serie; y

k) para evitar confusiones, cuando hubiera números romanos en el número o nombre del modelo de aeronave, en el presente documento siempre se remplazarán por números arábigos.

Clasificación por categoría de estela turbulenta (WTC)

El indicador de la categoría de estela turbulenta (WTC) seguirá al designador de tipo de aeronave y se anotará basándose en la masa máxima certificada de despegue, como sigue:

J (superpesada)	tipos específicos de aeronaves de 136 000 kg (300 000 lb) o más;
H (pesada)	tipos de aeronaves de 136 000 kg (300 000 lb) o más, excepto las incluidas en la categoría **J**;
M (media)	tipos de aeronaves de menos de 136 000 kg (300 000 lb) y más de 7 000 kg (15 500 lb); y
L (ligera)	tipos de aeronaves de 7 000 kg (15 500 lb) o menos.

Nota.— Cuando las variantes de un tipo de aeronaves corresponden a diferentes categorías de estela turbulenta, se indican ambas categorías (p. ej., L—M o M—H). En estos casos la/el piloto o el explotador es responsable de anotar en la casilla 9 del formulario modelo de plan de vuelo de la OACI el indicador apropiado de una sola letra de la categoría de estela turbulenta.

Clasificación por grupos de estela turbulenta (WTG)

El designador de grupo de estela turbulenta (WTG) se utiliza para aplicar las mínimas de separación reducida respecto de la estela turbulenta que se indica en los *Procedimientos para los servicios de navegación aérea — Gestión del tránsito aéreo* (PANS-ATM, Doc 4444) pero no se ingresa en el formulario modelo de plan de vuelo de la OACI. Los designadores del WTG se basan en las características de la aeronave en cuanto a la resistencia y generación de la estela, que dependen principalmente de la masa máxima certificada de despegue, las características de las alas y las velocidades.

Descripción de los designadores de grupo:

GRUPO A — tipos de aeronaves de 136 000 kg o más y una envergadura de ala de más de 74,68 m pero inferior o igual a 80 m;

GRUPO B — tipos de aeronaves de 136 000 kg o más y una envergadura de ala de más de 53,34 m pero inferior o igual a 74,68;

GRUPO C — tipos de aeronaves de 136 000 kg o más y una envergadura de ala de más de 38,1 m pero inferior o igual a 53,34 m;

GRUPO D — tipos de aeronaves de menos de 136 000 kg pero más de 18 600 kg, y una envergadura de ala superior a 32 m;

GRUPO E — tipos de aeronaves de menos de 136 000 kg pero más de 18 600 kg, y una envergadura de ala inferior o igual a 32 m pero superior a 27,43 m;

GRUPO F — tipos de aeronaves de menos de 136 000 kg pero más de 18 600 kg, y una envergadura de ala inferior o equivalente a 27,43 m; y

GRUPO G — tipos de aeronaves de hasta 18 600 kg (sin criterio de envergadura de ala).

Descripción del tipo de aeronave

Se emplearán tres caracteres para la descripción del tipo de aeronave:

Primer carácter:

L avión terrestre
S hidroavión
A anfibio
H helicóptero
G girohelicóptero
T aeronave de rotores basculantes

Nota.— Los aviones con flotadores que pueden convertirse temporalmente en avión terrestre o viceversa, no figurarán en la lista como hidroavión o anfibio sino como avión terrestre.

Segundo carácter:

1, 2, 3, 4, 6, 8 o C — número de motores

Nota.— El carácter C se aplica únicamente a aeronaves de alas fijas e indica que dos motores están acoplados para accionar un solo sistema de hélice.

Tercer carácter:

P motor de émbolo
T motor de turbohélice/turboeje
J motor de reacción
E motor eléctrico
R motor cohete

*Ejemplo: **L2T** — avión terrestre con dos motores de turbohélice/turboeje.*

MEDIDAS QUE DEBEN ADOPTAR LOS ESTADOS

Se pide a los Estados que adopten las medidas pertinentes siguientes:

a) comunique a los fabricantes de aeronaves los fines de estos *Designadores de tipos de aeronave* y solicite su colaboración para su preparación y puesta en práctica, aplicando los principios en que se basa al asignar los designadores;

b) para mantener el documento actualizado, proporcione a la OACI cada año, de ser posible por archivo electrónico, la siguiente información de su registro de aeronaves:

— matrícula de la aeronave;
— fabricante, tipo y número de modelo;
— número de fabricación o de serie del fabricante; y
— expiración de la fecha del Certificado de aeronavegabilidad o del permiso/autorización de vuelo;

c) solicite a los departamentos militares que lleguen a un acuerdo para usar el designador civil respecto de aquellos tipos de aeronaves que se empleen indistintamente en operaciones civiles y militares.

ПРЕДИСЛОВИЕ

ОБЩИЕ ПОЛОЖЕНИЯ

В настоящем документе содержатся условные обозначения тех типов воздушных судов, которым обычно предоставляется обслуживание воздушного движения (ОВД). Он был первоначально подготовлен на основании рекомендаций Специализированного совещания по правилам полетов, обслуживанию воздушного движения и производству полетов (май 1963 года) и третьего совещания Группы экспертов по автоматизации управления воздушным движением (октябрь 1963 года) и опубликован в соответствии с указаниями Совета. С учетом важных замечаний, полученных от органов обслуживания воздушного движения, наиболее часто использующих в своей работе условные обозначения, Секретариат с помощью полномочного органа Нидерландов по управлению воздушным движением и Европейской организации по безопасности воздушной навигации (ЕВРОКОНТРОЛЬ) предпринял в 1996 году пересмотр этого документа. Цель пересмотра заключалась в том, чтобы обеспечить соответствие данного документа своему первоначальному предназначению с учетом изменений, обуславливаемых необходимостью отразить расширенное использование автоматизации при ОВД и обмен данными.

Новые издания данного документа будут публиковаться один раз в год, и, для того чтобы поддерживать его актуальность в период между изданиями, к самому последнему из них будут выпускаться поправки по мере их накопления. Содержащаяся в данном документе информация также имеется в электронном формате для распечатки, просмотра и поиска в диалоговой базе данных на веб-сайте по адресу: www.icao.int/publications/DOC8643/Pages/default.aspx.

Уведомления об ошибках и пропусках и просьбы о дополнительных условных обозначениях или поправках следует направлять в адрес Генерального секретаря ИКАО: 999 Robert-Bourassa Boulevard, Montréal, Quebec, Канада H3C 5H7.

СТРУКТУРА ДОКУМЕНТА

ЧАСТЬ 1: в ней перечислены широко распространенные наименования изготовителей воздушных судов с последующим указанием типов воздушных судов, которые они производят (производили).

ЧАСТЬ 2: в ней представлен перечень типов воздушных судов посредством условного обозначения их типов в алфавитно-цифровом порядке.

ЧАСТЬ 3: в ней приводится список типов воздушных судов посредством указания номера модели и/или наименования модели.

ЧАСТЬ 4: в ней перечислены широко распространенные наименования изготовителей воздушных судов с последующим указанием полного наименования (наименований) и кода производителя.

Примечание 1. Там, где номера или наименования моделей приводятся в скобках, они относятся к номерам или наименованиям военных моделей с последующим указанием наименований изготовителей или наоборот.

Примечание 2. Воздушное судно, изготовленное несколькими изготовителями (изготовление по лицензии, после слияния компаний, после изменения наименований компаний и т. д.), указывается в перечне под широко распространенным наименованием каждого изготовителя.

СОСТАВЛЕНИЕ УСЛОВНЫХ ОБОЗНАЧЕНИЙ ТИПОВ ВОЗДУШНЫХ СУДОВ И ДОПОЛНИТЕЛЬНОЙ ИНФОРМАЦИИ

Условные обозначения типов воздушных судов

При присвоении условного обозначения типа воздушного судна [1] ИКАО будет придерживаться следующих основных принципов:

a) Организация, в принципе, будет присваивать условные наименования типа всем воздушным судам с максимальной взлетной массой более 454 кг/1000 фунтов;

b) условное обозначение будет состоять из не более чем четырех знаков и в основном будет предназначаться для использования в **планах полета** и соответствующих **сообщениях**, относящихся к обслуживанию воздушного движения;

[1] Включает пилотируемые и беспилотные воздушные суда.

c) условное обозначение будет, в принципе, основываться на номере или наименовании модели изготовителя или на общераспространенном номере военного типа;

d) воздушному судну будет присваиваться только одно условное обозначение;

e) условное обозначение не будет меняться для воздушного судна, построенного по лицензии, когда воздушное судно данного типа продается или изготавливается другой компанией, или когда меняется наименование компании изготовителя, или когда воздушное судно данного типа получено или преобразовано из воздушного судна другого типа;

f) другое условное обозначение, предназначенное для варианта или подтипа, будет распределяться в случае существенного различия в характеристиках, имеющего значение для обслуживания воздушного движения, или в тех случаях, когда нельзя присвоить совместно используемое условное обозначение;

g) если условное обозначение должно использоваться для аэростата, планера, дирижабля, сверх-/ультралегкого воздушного судна, сверх-/ультралегкого вертолета, сверх-/ультралегкого автожира или моторизированного парашюта/параплана, применяются соответственно следующие условные обозначения: **BALL, GLID, SHIP, ULAC, UHEL, GYRO, PARA**;

Примечание 1. Для целей настоящего документа к сверх-/ультралегким воздушным судам относятся воздушные суда с максимальной сертифицированной взлетной массой 454 кг (1000 фунтов) и менее и скоростью сваливания не более 35 уз.

Примечание 2. К сверх-/ультралегким вертолетам и автожирам относятся вертолеты и автожиры с максимальной взлетной массой 454 кг (1000 фунтов) и менее.

h) если условное обозначение должно использоваться для беспилотного воздушного судна (UA) с максимальной взлетной массой 454 кг (1000 фунтов) или менее, применяются соответственно следующие условные обозначения:

FFLO (forward flight lift only) для UA, не способного находиться в режиме висения или выполнять вертикальный полет, и которому для выполнения полета необходимо двигаться горизонтально.

VFHC (vertical flight and hover capability) для UA, способного выполнять вертикальный полет и находиться в режиме висения.

Примечание. Для UA с поворотными несущими винтами или поворотным крылом, в этом пункте, должно применяться условное обозначение FFLO или VFHC в зависимости от способности воздушного судна выполнять тот или иной полет.

i) для воздушных судов тех типов, которые не указаны в настоящем документе, используется условное обозначение **ZZZZ** с описанием типа в графе 18 плана полета ИКАО;

j) кроме того, условные обозначения будут присваиваться имеющим более важное значение типам воздушных судов "отечественной постройки", однако они будут перечисляться только под заголовком первоначального разработчика или под заголовком изготовителя, который производит или производил данный тип в серии; и

k) в целях избежания путаницы римские цифры, являющиеся частью номеров или наименований моделей воздушных судов, будут в настоящем документе везде заменены на арабские.

Категория турбулентности в следе (WTC)

Показатель категории турбулентности в следе (WTC) будет следовать после условного обозначения типа воздушного судна и представляться на основе максимальной сертифицированной взлетной массы следующим образом:

J (супер)	конкретные типы воздушных судов массой 136 000 кг (300 000 фунтов) или более;
H (тяжелые)	типы воздушных судов массой 136 000 кг (300 000 фунтов) или более, за исключением указанных в **J**;
M (средние)	типы воздушных судов с массой менее 136 000 кг (300 000 фунтов) и более 7000 кг (15 500 фунтов);
L (легкие)	типы воздушных судов с массой 7000 кг (15 500 фунтов) или менее.

Примечание. В случае если варианты типа воздушного судна подпадают под разные категории турбулентности в следе, указываются обе категории (например, L/M или M/H). В таких случаях за включение соответствующей одной буквы для обозначения категории турбулентности в следе в раздел 9 типового плана полета ИКАО отвечает пилот или эксплуатант.

Группы турбулентности в следе (WTG)

Условное обозначение группы турбулентности в следе (WTG) используется для применения сокращенных минимумов эшелонирования с учетом турбулентности в следе, содержащихся в документе "Правила аэронавигационного обслуживания. Организация воздушного движения" (PANS-ATM, Doc 4444), однако такое условное обозначение не вводится в бланк типового плана полета ИКАО. Условные обозначения WTG основаны на данных о формировании следа и показателях устойчивости воздушного судна к такой турбулентности, которые зависят главным образом от максимальной сертифицированной взлетной массы, характеристик крыла и скорости.

Условные обозначения групп являются следующими:

ГРУППА A – типы воздушных судов массой 136 000 кг или более и размахом крыла, равным 80 м или менее, но более 74,68 м;

ГРУППА B – типы воздушных судов массой 136 000 кг или более и размахом крыла, равным 74,68 м или менее, но более 53,34 м;

ГРУППА C – типы воздушных судов массой 136 000 кг или более и размахом крыла, равным 53,34 м или менее, но более 38,1 м;

ГРУППА D – типы воздушных судов массой менее 136 000 кг, но более 18 600 кг и размахом крыла более 32 м;

ГРУППА E – типы воздушных судов массой менее 136 000 кг, но более 18 600 кг и размахом крыла, равным 32 м или менее, но более 27,43 м;

ГРУППА F – типы воздушных судов массой менее 136 000 кг, но более 18 600 кг и размахом крыла, равным 27,43 м или менее;

ГРУППА G – типы воздушных судов массой 18 600 кг или менее (без критерия размаха крыла).

Описание типов воздушных судов

Для составления описания типа воздушного судна будут использоваться три знака.

Первый знак:

L сухопутный самолет
S гидросамолет
A амфибия
H вертолет
G автожир
T воздушное судно с поворотными несущими винтами

Примечание. Поплавковые гидросамолеты, которые могут быть временно переделаны в сухопутный самолет или наоборот, не будут указываться как гидросамолеты или амфибии, а вместо этого будут указываться как сухопутные самолеты.

Второй знак:

1, 2, 3, 4, 6, 8 или C — число двигателей.

Примечание. Знак C применяется только к воздушным судам с неподвижным крылом и означает, что два двигателя спарены для приведения в движение единой системы воздушных винтов.

Третий знак:

P поршневой двигатель,
T турбовинтовой/турбовальный двигатель,
J турбореактивный двигатель,

E электрический двигатель.
R ракетный двигатель

*Пример: **L2T** — сухопутный самолет с двумя турбовинтовыми/турбовальными двигателями.*

ДЕЙСТВИЯ ГОСУДАРСТВ

Государствам предлагается предпринять следующие действия, т. е.:

a) информировать изготовителей воздушных судов о целях документа *"Условные обозначения типов воздушных судов"* и просить их сотрудничать в разработке и внедрении этого документа путем применения лежащих в его основе принципов при присвоении таких условных обозначений;

b) в целях постоянного обновления данного документа ежегодно предоставлять в ИКАО, по возможности в виде электронного файла, следующую информацию из своих регистров воздушных судов:

— регистрационный номер воздушного судна;
— изготовитель, тип и номер модели;
— заводской или серийный номер изготовителя; и
— дата окончания срока действия удостоверения годности к полетам или допуска/разрешения на выполнение полетов;

c) просить военные ведомства согласиться с использованием гражданского условного обозначения для тех типов воздушных судов, которые используются как для гражданских, так и военных полетов.

تمهيد

عام

تتضمن هذه الوثيقة رموز طرازات الطائرات التي تحصل عادة على خدمات الحركة الجوية. وقد أعدت هذه الوثيقة في الأصل بناء على توصيات اجتماع شعبة قواعد الجو وخدمات الحركة الجوية والعمليات (مايو ١٩٦٣) والاجتماع الثالث لفريق خبراء المراقبة الآلية للحركة الجوية (أكتوبر ١٩٦٣) ونُشرت وفقا لتوجيهات المجلس. ونتيجة تقديم ملاحظات عديدة من وحدات خدمات الحركة الجوية، وهم أكبر فئة مستخدمة للرموز، قامت الأمانة العامة، بمساعدة من هيئة مراقبة الحركة الجوية في هولندا والمنظمة الأوروبية لسلامة الملاحة الجوية، بمراجعة شاملة للوثيقة في عام ١٩٩٦. وأجريت المراجعة بهدف ضمان وفاء الوثيقة بالغرض الأصلي منها وتعديلها بما يستجيب للاستخدام المتزايد للنظم الآلية في خدمات الحركة الجوية وفي تبادل البيانات.

وستصدر طبعات جديدة من الوثيقة مرة كل عام. وحرصا على بقاء الوثيقة محدثة في الفترة الفاصلة بين صدور طبعة وأخرى، ستنشر التعديلات المدخلة على آخر طبعة بمجرد تجميعها. وتتاح المعلومات المضمنة في هذه الوثيقة أيضا لطباعتها وقراءتها والبحث في محتوياتها في نسخة إلكترونية عن طريق قاعدة البيانات الإلكترونية التي يمكن الاطلاع عليها في العنوان: www.icao.int/publications/DOC8643/Pages/default.aspx.

وينبغي أن توجه كل الرسائل التي تشير إلى ورود أخطاء أو إسقاطات في الطبعة أو تطلب معلومات أو تعديلات إضافية، إلى الأمين العام للإيكاو، على العنوان: 999 Robert-Bourassa Boulevard, Montréal, Quebec, Canada H3C 5H7.

هيكل الوثيقة

الجزء الأول: قوائم بالأسماء المتداولة لمُصنّعي الطائرات، متبوعة بطرازات الطائرات التي ينتجونها.

الجزء الثاني: قوائم بطرازات الطائرات بحسب الترتيب الهجائي العددي لرموز الطراز.

الجزء الثالث: قوائم بطرازات الطائرات بحسب رقم و/أو اسم الطراز.

الجزء الرابع: قوائم بالأسماء الجارية لمُصنّعي الطائرات، متبوعة بأسمائها الكاملة والرمز الخاص بالتصنيع.

ملاحظة ١ — تُشير أرقام أو أسماء الطراز الواردة بين قوسين إلى أرقام أو أسماء الطراز العسكري، متبوعة بأرقام أو أسماء المُصنّع، أو العكس.

ملاحظة ٢ — يدرج كل طراز طائرة يصنّعه أكثر من مصنع واحد (التصنيع بناء على ترخيص، انتقال ملكية الشركة، تغييرات في اسم الشركة، وغير ذلك) في القائمة بالاسم التجاري لكل مصنع.

صياغة رموز طرازات الطائرات ومعلومات إضافية

رموز طرازات الطائرات

تقوم الإيكاو بإسناد رمز لطراز الطائرة[1] وفقا للمبادئ الأساسية التالية:

أ) تقوم من حيث المبدأ بإسناد رمز طراز الطائرة لجميع الطائرات من هذا الطراز والتي يزيد الحد الأقصى لكتلتها عند الإقلاع على ٤٥٤ كيلوجرام/١٠٠٠ رطلاً؛

ب) لا يتجاوز الرمز أربعة أحرف، والغرض الرئيسي من هذا الرمز هو أن يستخدم في **خطط الطيران** ويقترن **برسائل** خدمات الحركة الجوية؛

ج) يُشتق الرمز مبدئيا من رقم أو اسم الموديل الذي وضعه المُصنّع، أو من رقم طراز عسكري عام؛

---

[1] يشمل الطائرات المأهولة وغير المأهولة.

د) يسند رمز واحد فقط لكل طراز من الطائرة؛

هـ) لا يتغير رمز طائرة مصنعة بناء على ترخيص، عندما يباع طراز الطائرة إلى شركة أخرى أو عندما تقوم هذه الشركة بتصنيعه، أو عندما يتغير اسم شركة التصنيع أو عندما يكون طراز الطائرة مشتقا أو محوّرا من طراز آخر؛

و) لا يسند رمز مختلف لطراز بديل أو طراز فرعي إلا إذا كان الاختلاف في الأداء ذا شأن بالنسبة لخدمات الحركة الجوية، أو إذا تعذر إسناد رمز مشترك؛

ز) إذا تعين استخدام رمز لبالون أو طائرة بلا محرك، أو منطاد، أو طائرة صغيرة أو خفيفة للغاية، أو هليكوبتر صغيرة أو خفيفة للغاية، أو طائرة ذات دوران ذاتي صغيرة أو خفيفة للغاية، أو مظلة/طائرة مظلية بمحرك فينبغي أن تستخدم هذه الرموز على التوالي: **BALL**، **GLID**، **SHIP**، **ULAC**، **UHEL**، **GYRO**، **PARA**؛

ملاحظة ١ — لأغراض هذه الوثيقة، يُقصد بالطائرة الصغيرة/الخفيفة للغاية طرازات الطائرات التي لا تتجاوز كتلتها القصوى عند الإقلاع ٤٥٤ كيلوجرام/١٠٠٠ رطل وسرعة انهيار لا تتجاوز ٣٥ عقدة.

ملاحظة ٢ — تقصد بالطائرة الهليكوبتر الصغيرة أو الخفيفة للغاية والطائرة ذات الدوران الذاتي (gyrocopters) الصغيرة أو الخفيفة للغاية طرازات الطائرات التي لا تتجاوز كتلتها القصوى المرخص بها عند الإقلاع ٤٥٤ كيلوجرام/١٠٠٠ رطل.

ح) إذا تعيّن استخدام رمز لإحدى الطائرات غير المأهولة التي يزيد الحد الأقصى لكتلتها عند الإقلاع على ٤٥٤ كيلوجرام/ ١٠٠٠ رطلاً، يجب استخدام الرموز التالية على التوالي:

FFLO (الطيران إلى الأمام لأغراض الرفع فقط) للطائرات غير المأهولة التي ليست لديها القدرة على القيام بالتحليق أو الطيران الرأسي ويتعيّن أن تتحرّك بشكل أفقي للحفاظ على الطيران.

VFHC (القدرة على الطيران والتحليق الرأسي) للطائرات غير المأهولة التي لديها القدرة على الطيران والتحليق الراسي.

ملاحظة — ينبغي أن تستخدم الطائرة غير المأهولة ذات المراوح القلابة أو الأجنحة القلابة، في إطار هذا البند، الطيران إلى الأمام لأغراض الرفع فقط أو القدرة على الطيران والتحليق الرأسي وفقاً قدرات الطائرة على التشغيل الخاص.

ط) يجب أن تستخدم طرازات الطائرات التي لا ترد في هذه الوثيقة الرمز **ZZZZ**، مع وصف طرازها في الخانة ١٨ في خطة الإيكاو للطيران؛

ي) تُسند رموز لأهم طرازات الطائرات "المنزلية الصنع"، غير أنها لا تُسجّل في القائمة إلا تحت خانة المصمم الأصلي، أو تحت خانة المصنع الذي أنتج أو ينتج مجموعات منها؛

ك) تفاديا للبس، تحل الأرقام العربية محل الأرقام الرومانية التي تشكل جزءاً من أرقام أو أسماء طرازات الطائرات الواردة في هذه الوثيقة.

فئة الاضطراب الظلي (WTC)

يتبع مؤشر فئة الاضطراب الظلي (WTC) رمز طراز الطائرة ويُحدد بالاستناد إلى الكتلة القصوى المرخص بها عند الإقلاع، على النحو التالي:

J (كبير – Super) طرازات الطائرات المحددة التي تساوي كتلتها أو تفوق ١٣٦ ٠٠٠ كيلوجرام (٣٠٠ ٠٠٠ رطل)؛

H (ثقيل – Heavy) طرازات الطائرات التي تساوي كتلتها أو تفوق ١٣٦ ٠٠٠ كيلوجرام (٣٠٠ ٠٠٠ رطل)، ماعدا تلك المذكورة تحت الرمز "**J**" (كبير)؛

M (متوسط – Medium) طرازات الطائرات التي تقل كتلتها عن ١٣٦ ٠٠٠ كيلوجرام (٣٠٠ ٠٠٠ رطل) وتزيد عن ٧٠٠٠ كيلوجرام (١٥ ٥٠٠ رطل)؛

L (خفيف – Light) طرازات الطائرات التي لا تتجاوز كتلتها ٧٠٠٠ كيلوجرام (١٥ ٥٠٠ رطل).

ملاحظة — عندما تندرج أنواع متباينة من طراز طائرة ما في فئات مختلفة من الاضطراب الظلي، فإن كلتا الفئتين تذكر (مثلا L-M أو M-H). وفي هذه الحالات، تقع المسؤولية على قائد الطائرة أو المشغل لتسجيل الحرف الوحيد المناسب لرمز فئة الاضطراب الظلي (WTC) في الخانة ٩ من استمارة نموذج خطط الطيران للإيكاو.

مجموعات الاضطراب الظلي (WTG)

يُستخدم رمز مجموعة الاضطراب الظلي من أجل تطبيق الحدود الدنيا للفصل بالنسبة للاضطراب الظلي المنصوص عليها في وثيقة *إجراءات خدمات الملاحة الجوية — إدارة الحركة الجوية* (Doc 4444 – PANS-ATM)، إلا أن هذا الرمز لا يُسجل في استمارة نموذج خطط الطيران للإيكاو. وتستند هذه الرموز إلى خصائص الطائرة من حيث توليد الاضطرابات والمقاومة، وهي أمور تعتمد في المقام الأول على كتلة الإقلاع القصوى المرخص بها وخصائص الأجنحة والسرعات.

ويرد فيما يلي وصف رموز المجموعات:

المجموعة (A) — طرازات الطائرات التي تساوي كتلتها أو تفوق ٠٠٠ ١٣٦ كيلوجرام، ويبلغ باع جناحيها ٨٠ متراً أو أقل ولكنه يزيد عن ٧٤.٦٨ متر؛

المجموعة (B) — طرازات الطائرات التي تساوي كتلتها أو تفوق ٠٠٠ ١٣٦ كيلوجرام، ويبلغ باع جناحيها ٧٤.٦٨ متر أو أقل ولكنه يزيد عن ٥٣.٣٤ متر؛

المجموعة (C) — طرازات الطائرات التي تساوي كتلتها أو تفوق ٠٠٠ ١٣٦ كيلوجرام، ويبلغ باع جناحيها ٥٣.٣٤ متر أو أقل ولكنه يزيد عن ٣٨.١ متر؛

المجموعة (D) — طرازات الطائرات التي تقل كتلتها عن ٠٠٠ ١٣٦ كيلوجرام ولكنها تزيد عن ٦٠٠ ١٨، ويزيد باع جناحيها ٣٢ متراً؛

المجموعة (E) — طرازات الطائرات التي تقل كتلتها عن ٠٠٠ ١٣٦ كيلوجرام ولكنها تزيد عن ٦٠٠ ١٨، ويبلغ باع جناحيها ٣٢ متراً أو أقل ولكنه لا يزيد عن ٢٧.٤٣ متر؛

المجموعة (F) — طرازات الطائرات التي تقل كتلتها عن ٠٠٠ ١٣٦ كيلوجرام ولكنها تزيد عن ٦٠٠ ١٨، ويبلغ باع جناحيها ٢٧.٤٣ متر أو أقل؛

المجموعة (G) — طرازات الطائرات التي تساوي كتلتها أو تقل عن ٦٠٠ ١٨ كيلوجرام، بدون معيار خاص لباع جناحيها).

وصف طراز الطائرة

تستخدم ثلاثة أحرف لوصف طراز الطائرة:

الحرف الأول:

L طائرة
S طائرة مائية
A طائرة برمائية
H هليكوبتر
G طائرة ذات دوران ذاتي (جيرو)
T طائرة ذات جناح قلاب

ملاحظة — لا تُسجّل الطائرة العائمة، التي يمكنها مؤقتا أن تتحول إلى طائرة برية أو العكس، كطائرة مائية أو طائرة برمائية ولكنها تُسجّل كطائرة برية.

الحرف الثاني:

1 أو **2** أو **3** أو **4** أو **6** أو **8** أو **C** — عدد المحركات

ملاحظة — لا ينطبق الحرف C سوى على الطائرة الثابتة الجناح ويشير إلى وجود محركين معاً لتوليد الدفع لمروحة واحدة.

الحرف الثالث:

P محرك مكبسي
T محرك عمود دوران توربيني
J محرك نفاث
E محرك كهربائي
R محرك صاروخي

مثال: L2T — طائرة بمحركين مروحيين/محركي عمود دوران توربيني

الإجراءات التي يتعين على الدول اتخاذها

يطلب من الدول اتخاذ الإجراءات المناسبة، أي:

أ) أن تبلغ مصنعي الطائرات بالغرض من رموز طرازات الطائرات وطلب تعاونها في إعداد هذه الرموز والعمل بها من خلال تطبيق المبادئ التي تقوم عليها عند إسناد هذه الرموز؛

ب) أن تزود الإيكاو سنويا، في ملف إلكتروني إن أمكن، بالمعلومات التالية المستقاة من سجلات طائراتها من أجل ضمان وجود آخر المعلومات في هذه الوثيقة:

— تسجيل الطائرة؛
— المصنع والطراز ورقم الموديل؛
— الرقم المسلسل للمصنع أو رقم التصنيع؛
— تاريخ انتهاء صلاحية شهادة صلاحية الطائرة للطيران، أو الرخصة أو الإذن بالطيران؛

ج) أن تطلب من القطاعات العسكرية الموافقة على استخدام رمز مدني فيما يخص طرازات الطائرات التي تستخدم في العمليات المدنية والعسكرية معا.

前言

总则

本文件包含那些通常向其提供空中交通服务（ATS）的航空器的代码。它最初是作为空中规则和空中交通服务/运行专业会议（1963年5月）和空中交通管制自动化专家组第三次会议（1963年10月）建议的结果编制而成，并根据理事会的指示出版。根据从代码最常见的业务用户空中交通服务单位收到的实质性意见，秘书处在荷兰空中交通管制和欧洲空中航行安全组织（EUROCONTROL）的协助之下，于1996年对文件进行重大修订。修订已完成，目标是确保文件满足其原来的目的，并予以修订以适应空中交通服务和数据交换更多地使用自动化。

新版文件将一年发行一次，并使文件在版本之间保持最新，最新版本的修订将随其积累予以出版。通过访问www.icao.int/publications/DOC8643/Pages/default.aspx，本文件所载信息也可以通过在线网站数据库以电子格式印刷、查看和搜索。

差错、遗漏、申请额外分配或修改应通知国际民航组织秘书长：999 Robert-Bourassa Boulevard, Montréal, Quebec, Canada H3C 5H7。

文件结构

第1部分：列出航空器制造商的通用名称，其次是其生产的航空器机型。

第2部分：以字母数字顺序按照型号代码列出航空器型号。

第3部分：按照机型编号和/或机型名称列出航空器型号。

第4部分：列出航空器制造商的通用名称，其次是其全称和制造代码。

注1：如果机型编号或机型名称是在括号之内，它们是指制造商名称之后的军用型号编号或名称，或反之亦然。

注2：由一个以上制造商（根据许可证生产、公司接管、公司名称变化等）建造的一种航空器型号，列在每个制造商的通用名称之下。

航空器[1]型号代码和其他信息的编制

航空器型号代码

国际民航组织将按照以下基本原则指定航空器型号代码：

a) 原则上，它会为所有最大起飞质量为454 千克/1 000磅以上的航空器指配一个航空器型号代码；

b) 一个代码不得超过四个字符，主要用于飞行计划和有关的空中交通服务电报；

c) 一个代码原则上衍生于制造商的机型编号和/或机型名称，或者一个通用军用型号；

d) 每种航空器型号只指配一个代码；

[1] 包括有人和无人航空器。

e) 航空器型号被出售或由不同公司制造，或者当一个制造公司名称改变，或者当航空器型号从另一种型号衍生或转换，按照许可制造的航空器代码不会改变；

f) 只有当其性能差异与空中交通服务显著不同，或不能指配共享代码时，方可以对改型或者子类型指配代码；

g) 如果必须对气球、滑翔机、飞艇、微型/超轻型航空器、微型/超轻型直升机、微型/超轻型旋翼机或动力伞/伞降飞机使用一个代码时，应分别使用以下代码：**BALL，GLID，SHIP，ULAC，UHEL，GYRO，PARA**；

注1：为本文件之目的，微型/超轻型航空器是指最大起飞质量为454千克/1 000磅或以下，且失速速度不大于35节的航空器型号。

注2：微型/超轻型直升机和旋翼机是指最大审定起飞质量为454千克/1 000磅或以下的直升机或旋翼机。

h) 如果需必须对最大起飞质量为454千克/1 000磅或以下的无人航空器（UA）使用一个代码时，应分别使用以下代码：

FFLO（仅前向飞行升空）用于不能够悬停或垂直飞行而需要做水平运动才能维持飞行的无人航空器。

VFHC（垂直飞行和悬停能力）用于能够垂直飞行和悬停的无人航空器。

注：在此项下，倾转旋翼或倾转机翼无人航空器应根据特定运行的航空器能力使用FFLO或VFHC。

i) 本文件中未列出的航空器型号须使用代码**ZZZZ**表示，并在国际民航组织飞行计划编组第18项对型号进行说明；

j) 更重要的“自制”航空器型号也将被指配代码，但是，它们将只列在原设计者名称之下，或列在生产或生产（过）系列型号的制造商名称之下；和

k) 为了避免混淆，在本文件中，构成航空器机型号码或名称组成部分的罗马数字，都使用阿拉伯数字代替。

尾流紊流类型（WTC）

尾流紊流类型（WTC）指示符列在航空器型号代码之后，并按照最大审定起飞质量列出，如下所示：

J（超重型） 136 000千克（300,000磅）或以上的特定航空器型号；
H（重型） 除以上列为J以外的136 000千克（300,000磅）或以上的航空器型号；
M（中型） 轻于136 000千克（300,000磅），但重于7000千克（15 500磅）的航空器型号；和
L（轻型） 7000千克（15 500磅）或以下的航空器型号。

注：当航空器改型属于不同尾流紊流类型时，列出两种类型（如L-M或M-H）。在这种情况下，驾驶员或运营人有责任在国际民航组织标准的飞行计划表第9项中输入相应的单字母尾流紊流类型指示符。

尾流紊流分组（WTG）

尾流紊流分组（WTG）代码用于施行《空中航行服务程序 — 空中交通管理》（PANS-ATM，Doc 4444号文件）中所载的缩小的最低尾流紊流间隔标准，但是该代码未输入国际民航组织标准的飞行计划表之中。WTG代码基于航空器产生尾流的特性和阻力特性，而这主要取决于最大审定起飞质量、机翼特性和速度。

各分组代码说明如下：

A组 — 136 000 千克或以上、且翼展小于或等于80 米但大于74.68 米的航空器型号；

B组 — 136 000 千克或以上、且翼展小于或等于74.68 米但大于53.34米的航空器型号；

C组 — 136 000 千克或以上、且翼展小于或等于53.34米但大于38.1米的航空器型号；

D组 — 136 000 千克以下但18 600千克以上、且翼展大于32米的航空器型号；

E组 — 136 000 千克以下但18 600千克以上、且翼展小于或等于32米但大于27.43米的航空器型号；

F组 — 136 000 千克以下但18 600千克以上、且翼展小于或等于27.43米的航空器型号；和

G组 — 18 600千克或以下（无翼展衡量指标）的航空器型号。

航空器型号说明

航空器型号说明使用三个字符组成：

第一个字符：

L 陆上航空器
S 水上航空器
A 水陆两栖航空器
H 直升机
G 旋翼机
T 倾转机翼航空器

注：可以暂时转换为陆上航空器或反之亦然的水上飞机，不被列为水上航空器或水陆两栖航空器，但列为陆上航空器。

第二个字符：

1，2，3，4，6，8或C， — 发动机台数

注：字母C只适用于固定翼航空器，表示两台发动机耦合连动驱动单螺旋桨系统。

第三个字符：

P 活塞式发动机
T 涡桨/涡轴发动机
J 喷气发动机
E 电子发动机
R 火箭发动机

示例：L2T — 一架装备两台涡桨/涡轴发动机的陆上航空器。

国家采取的行动

要求国家采取适当的行动，比如：

a) 通知航空器制造商《航空器型号代码》的目的，并要求它们通过应用指配代码所基于的原则合作编制并实施；

b) 为保证文件保持最新状态，如果可能的话，每年以电子文件方式向国际民航组织提供其航空器登记册中的如下信息：

— 航空器登记；
— 制造商、型号和机型；
— 制造商的序列号或建造号；和
— 适航证或飞行许可/授权证书的有效期。

c) 要求其军方同意为那些用于民用和军事行动的航空器型号使用民用代码。
