SCHWEIZER 269C-1 Model Guide

The SCHWEIZER 269C-1 is a single-engine piston helicopter in the Schweizer 269 family (269A, 269A-1, 269B, 269C, 269C-1, 269D). The inputs give no variant-specific performance or weight data, so check the aircraft's own manual and records.

KEY TAKEAWAYS

- SCHWEIZER 269C-1 is a piston-powered helicopter in the 269 family, which lists six variants.
- Family-level figures are up to 3 passengers, 310 nm range, 100 kt cruise and 14,000 ft ceiling.
- No variant-specific specs, weights or V-speeds are in the inputs. Get them from the aircraft's flight manual.
- A German Part 145 shop lists a Schweizer RSG spare parts list, and it repairs and overhauls main and tail gearboxes.

FAMILY CONTEXT (NOT 269C-1 SPECIFIC)

The 269 family covers 269A, 269A-1, 269B, 269C, 269C-1 and 269D. Across the family the registry shows up to 3 passengers, up to 310 nm range, up to 100 kt cruise, up to 1,000 kg MTOW and up to 14,000 ft service ceiling. These are maxima over all variants, so treat them as upper bounds.

PARTS AND SUPPORT

The inputs include a Schweizer RSG spare parts list from a Part 145 maintenance organisation (EASA DE.145.0096) that also holds CAMO approval. It describes itself as a main and tail gearbox repair and overhaul center. The part tables in the extract are empty, so confirm part numbers and availability directly with the shop.

SPECIFICATIONS

Max Passengers Family	3
Max Mtow Kg Family	1000

PERFORMANCE

Max Range Nm Family	310
Max Cruise Speed Kt Family	100
Max Service Ceiling Ft Family	14000

SAFETY NOTES

- Do not rely on family maxima for this variant. Verify weights, limits and performance against the aircraft's approved flight manual.
- Gearbox condition matters. The parts source highlights main and tail gearbox repair and overhaul, so review overhaul history and records.
