TECNAM P MENTOR Model Guide

The TECNAM P MENTOR is a piston single-engine aircraft from Tecnam. Registry data for the P-Mentor family shows up to 2 occupants, up to 600 kg MTOW and up to 119 kt cruise. The one document supplied is a seat rail service bulletin, so buyers should focus on seat rail condition and seat locking.

KEY TAKEAWAYS

- The TECNAM P MENTOR is a piston single-engine type with up to 2 occupants, per registry family data.
- Service Bulletin SB 738-CS requires a seat rail inspection on listed serial numbers.
- First inspection is due within 5 flight hours or 1 week; repeat every 100 flight hours.
- Aircraft with MOD2002/339 or SB-748-CS applied already address the seat rail bulletin.

FAMILY-LEVEL FIGURES (REGISTRY)

For the P-Mentor family, the registry lists up to 119 kt cruise speed, up to 14000 ft service ceiling and up to 600 kg MTOW. It lists up to 2 passengers. These are family maxima, not confirmed figures for any one aircraft. No range figure is given.

SEAT RAIL INSPECTION (SB 738-CS)

The bulletin covers serial numbers 1003 to 1056, 1064 to 1075 and 1078 to 1082, plus 1089, 1090, 1118, 1119, 1124, 1125 and 1126. It takes about 1 hour, with no material or tooling needed. The inspection checks the rail holes for deformation and wear, and checks for locking pin interference from the seat covering.

WHAT TO ASK THE SELLER

Ask for the serial number and whether it falls in the SB 738-CS range. Ask for proof the inspection was done and its date, and whether MOD2002/339 or SB-748-CS is fitted. Ask for the logged hours since the last inspection.

SAFETY NOTES

- Seat rail wear or locking interference could potentially result in seat unlocking.
- Before each flight, check that the seat is locked correctly after any adjustment.
- If seat rail deformation or abnormalities are found, report the result to Tecnam.
